Emergency Incident Control System Training

Course Overview:

This course is aimed at health management teams that will be expected to perform a role in an emergency. For example, General Managers, Chief Executives, Director of Care, General Practitioners, Communications, Finance, etc.

This program is based on the Australian Inter-Service Incident Management System (AIIMS). The principles are used by many agencies across Australia, such as Hunter Water, Sydney Catchment Authority, NSW Fire Brigade, NSW Health, NSW Rural Fire Service, National Parks and Wildlife Service, and many large private sector organisation's.

Outcomes:

This program supports participants to:

- Perform the key roles of Controller, Planning, Operations and Logistics in an Incident or Emergency Management Team.
- Establish an effective Incident/Emergency Management Team.

AIIMS provides a common management framework for organisations to use for emergency management roles and/or responding to emergency situations. As such, the system enables multiple agencies engaged in incident response or planning to seamlessly intergrate their resources and activities without missing a beat. Delivery is a combination of theoretical components and practical scenarios.

Delivery mode: Training will be delivered via face-to-face session

Training day/times: 1 day of training, 0815-1630 hours

Course cost: \$300.00 pp

Date: 23rd November 2020

Location: Maroba – 58 Edith Street
Waratah, NSW 2298
